ID Gateway

Goals

1. Describe a variety of PhD careers that are alternatives to the traditional PI pathway.

2. Become familiar with clinical microbiological approaches to management of infectious diseases.

3. Identify and discuss clinical problems that require basic microbiological approaches.

Expectations

1. Active participation in speaker discussion of PhD career paths and the projects they entail.

2. Once-per-month attendance at Infectious Diseases Grand Rounds, which meet on Tuesday mornings at 8am in the Scarpellino Auditorium, Barnes Hospital.

3. Once-per-month participation in clinical round with adult or pediatric Infectious Diseases consulting physicians.

4. One 15 minute presentation that discusses basic microbiological approaches used to solve a clinical question in the diagnosis or management of an infectious disease.
